

## **New Review Article on Enhanced External Counter Pulsation is Published on Cardiology Today Journal**

**Press Release: 5<sup>th</sup> Sep 2015**

**(Vaso-Meditech Pvt Ltd, exclusive distributor and clinical support for EECP in India)**

Enhanced External Counter Pulsation therapy is now available widely in many centers across India. New recommendations, reviews and text book chapters are being published regularly which reveal increasing awareness of EECP among cardiologist and medical fraternity across India. EECP is currently used as an option for patient who are not a candidate for interventional procedures and who have poor LV function. Looking EECP as a holistic approach for the treatment of endothelial dysfunction and to improve general well being are all interesting one.

A new review article published in Cardiology Today Vol XIX No 5 Sep-Oct 2015 has focused on the cardiovascular disease protection and regenerative potential of Enhanced External Counter Pulsation. EECP has shown not only to improve symptoms in Angina and heart failure patients but also shown to reduce blood pressure, blood glucose and arterial stiffness. The treatment also has shown to increase the natural stem cells in the circulation promoting vascular repair and angiogenesis. This new mechanism of possible arrest or positively modifying the progression of atherosclerotic disease can have a major impact in recommendation of EECP in angina and heart patients.
