Government Kilpauk Medical College Hospital Inaugurated Enhanced External Counter Pulsation treatment in its Non-Invasive Cardiology Wing

**Press Release Chennai May 21st 2015. (Vaso-Meditech Pvt Ltd, exclusive distributor
and clinical support for EECF in India)**

Government Kilpauk Medical college Hospital has Inaugurated Enhanced External Counter Pulsation for cardiac patients in their cardiology department. Speaking on this occasion Dean Dr.Narayana Babu informed, EECF treatment will act like a second heart placed in the leg, pumping the blood from the lower leg towards the heart, so that blood flow in the heart is improved without any invasive procedure. He explained the treatment will be given one hour for 35 days six days a week. Due to increase blood flow in the heart muscles new blood vessel are forced to open around the blocked arteries and also dilate the arteries allowing it to carry the more blood flow to blood flow deficient area.

The treatment is covered by Chief Minister Comprehensive Health Insurance Plan (CMCHIS) and provided to patients below poverty line free of cost. The function was attended by physicians, paramedical staffs, nursing staffs, post graduate students and medical students. Dr. Ravindran Prof of medicine & cardiology department in charge informed the cardiology department of Kilpauk medical college will initiate patient awareness campaign and educational program for physicians to spread awareness about this novel non-invasive treatment. The objective would be to drive to the patients when they make decision on available treatment they should be aware other than bypass surgery and angioplasty non-invasive safe alternative is now available for their cardiac alignment.

Dr.S.Ramasamy EECP program Co-ordinator and director of Vaso Meditech Pvt Ltd thanked the Dean, Prof. of Cardiologist and other faculty for their effort to bring the Non-Invasive treatment to Kilpauk Medical college Hospital. He said the team of cardiologist with general physicians and clinically trained nurse will provide the needy cardiac patient EECP treatment to improve their quality of life and their heart function.
