

New Original Research Article on Enhanced External Counter Pulsation treatment published in Journal of Clinical and Diagnostic Research

Journal of Clinical and Diagnostic Research published the study on EECP on its October issue. The article entitled "Effect of Enhanced External Counterpulsation treatment on Aortic Blood pressure, arterial stiffness and ejection fraction in patients with Coronary Artery Disease. The article was authored by Dr.S.Ramasamy EECP expert and consultant in Frontier Life Line Hospital along with Dr.Sushma N, Dr.Chokkalingam M, Dr.Arumugam C and Dr.Nayar P all were faculty from Chettinad heart and research institute. This article confirms EECP improve left ventricular function and have a favourable effect on the blood pressure in patients with normal and low brachial systolic pressure.

This paper is the first to show the effects of EECP in improving left ventricular ejection fraction, a parameter to measure the overall pumping efficacy of the heart. The improvement shown in this group of patients who has poor heart pumping function called heart failure are usually difficult to treat patients with poor outcome with current medical and device based heart failure management.

EECP treatment will be new hope for them.

The study can be accessed using the link below

Vaso-Meditech Pvt Ltd company was incorporated on 2001 as an exclusive distributor for Vasomedical Non-Invasive cardiac treatment Enhanced External Counterpulsation and Atcor Medical Non-Invasive central blood pressure and arterial age assessing device SphygmoCor. Vaso-Meditech has established service and clinical network across India to support the products technically and clinically. The company has supported publication of various research articles in major peer review journal in India and abroad. Additional information is available on the Company's website at www.vasomeditech.com, www.healurheart.com
